

# BENZEMA

## Emamectin Benzoate 1.9% EC

Emamectin benzoate 1.9%EC is a water-soluble liquid formulation containing 1.9% A.I. and is recommended for the control of bollworms in cotton and other multiple insects.

- **Cotton Bollworms**
- **Fruit Borer (Tomato crop)**
- **Leaf Folder & Hispa in Rice**

This highly effective formulation ensures long-lasting pest control, safeguarding crop health and yield.

**Always read and follow label instructions.**

# BENZEMA: PRECISION PROTECTION FOR YOUR CROPS AGAINST DEVASTATING PESTS

**Active Ingredient:** Emamectin Benzoate 1.9% EC

- Features:**
- It is a broad-spectrum insecticide.
  - It has rain-fastness of two hours which means even if rain comes after two hours product will still perform.
  - It has ovilarvicidal activity therefore kills the larvae immediately after hatching which ensures no further loss of crop.

## Mode of Action:

Emamectin Benzoate 1.9% EC is a stomach-action insecticide that paralyzes larvae upon ingestion, causing them to stop feeding and die within 2-4 days.

## Recommended Dose:

Crops	Common Name of Pest	Dosage / HA		Dilution in water (L)	Waiting Period between last spray to harvest (days)
		AI (g)	Formulation (ml)		
Cotton	Bollworms	11	580	500	15 (Days)
Tomato	Fruit Borer		375	500	15 (Days)
Rice	Leaf folder & Hispa		425	500	

## Antidote:

No specific antidote is known. Treat symptomatically.

## Packing:

1 L

Always read and follow label instructions.
