

FLYGUARD

Is a highly efficient indoor insect control device designed to protect your space from flying insects. Using a UV light to attract flies, it traps them on a high-quality glue board, ensuring they cannot escape. The glue board lasts 4 to 6 weeks and is easy to replace. Flyguard is safe for humans and pets, making it ideal for homes, factories, food shops, hospitals, kitchens, and more.

Effective against:

- Flies
- Other flying insects

Always read and follow label instructions.

FLYGUARD: SAFEGUARD YOUR SPACE, TRAP THE UNINVITED.

Features:

- FLYGUARD uses the specific wavelength of a UV light tube to attract live flying insects
- The insects are drawn towards the glue board and cannot escape due to the high quality of glue pasted on the board.
- The glue board lasts a minimum of 4 to a maximum of 6 weeks, depending on the situation, and can be simply replaced with a new one.
- FLYGUARD is highly efficient and completely harmless to humans and pets
- FLYGUARD is ideal for indoor use such as in houses, factories, food shops, butcher storage, hospitals, kitchens, etc.
