

A cobra snake is coiled in a grassy field with its hood flared. To its left, a long, silver snake catcher stick is shown in a semi-transparent, floating position. To its right, a pair of red-handled pliers is also shown in a semi-transparent, floating position. The background is a lush green field with trees under bright sunlight.

SNAKE CATCHER STICK

The ARBUDA Snake catcher stick is an essential tool to catch live snakes, it features:

- **Soft catch-grips** that prevent injury to the snake
- **Long pole** to maintain a safe distance during live snake-catching operation
- **Lightweight and easy-to-use** design for field operations

Always read and follow label instructions.
