

# ITRAKER

The iTraker by Termatrac is a groundbreaking tool for pest management professionals, using advanced radar technology to non-intrusively detect and track termite activity in real time. Key features include:

- **Real-time detection and tracking of termite activity**
- **Non-intrusive radar sensor for accurate inspections**
- **Customizable reports for tailored data presentation**
- **Cloud storage for easy access and secure data management**

# REVOLUTIONARY RADAR FOR REAL-TIME TERMITE DETECTION AND TRACKING EXCELLENCE.

## Description and Features:

The only device that detects, confirms, and tracks the presence of Termite.

- iTraker Radar Sensor Features: Uses non-intrusive, low-energy microwaves to detect activity. High-frequency radar emissions accurately locate and monitor termite and insect movements without disturbance. Real-time radar data integrates into the display device for pre and post-treatment reports.
- The innovative method to confirm and track the presence of termites and other pests. ABOUT RADAR ONLY The Termatrac iTraker Radar Sensor is the ultimate tool for Pest Management Professionals (PMPs) or building inspectors. The low-energy microwave technology is a non-destructive method of confirming termites and other pests. The Radar Sensor is ideal for identifying the movement and the extent of activity of all pests. The device is an easy-to-use tool that assists you in getting inspections done confidently. Pinpoint where active infestation has gone post-treatment and eliminate guesswork out of inspections

Always read and follow label instructions.

- **RADAR SENSOR INSPECTIONS** Having the Tracker with you will save you time by reducing the need to tone-inspect an area because of uncertainty Build your confidence to accept big inspection jobs by understanding the reliability of the Tracker Device Gain trust and referrals by providing valid and reliable reports to your customers
- 
- **ITRAKER ONLINE REPORTING** The application on your display device captures on-site data using Bluetooth technology, so you can keep a record for on or off-site analysis. The iTraker App provides real-time data when tracking movement which you can save onto a Termatrac Cloud-Based Reporting System The reports are also a good way to keep track of your client's inspection history and post-treatment follow-ups. Termatrac reports can be customizable for you to add your business branding, and on-site photos and provide a Steral report to support the data.
